Dear Parent / Carer

I am writing to inform you that Year 7 students have recently completed their mathematics assessment. In the coming weeks, they will be bringing home a detailed Question Level Analysis (QLA), which provides a breakdown of their performance on each question and highlights areas where they can further develop their skills and understanding.

To support your child in using the QLA effectively, we have attached a guide outlining how to interpret and act on the information which can be found [here](#).

Please note that the QLA itself will be sent home with your child. Students will have also been spoken to in their maths lessons about how to use the QLA, so it should provide a useful tool to have conversations at home about their current strengths and areas for improvement in mathematics.

As a department, we are committed to helping students become confident, independent learners. We encourage them to focus on the process of learning and skill development rather than any single assessment. By reflecting on their QLA and working on targeted areas, students can build a deeper understanding of mathematics and develop strategies to improve across all topics.

Consistent effort and a willingness to refine skills will help students make sustained progress and prepare them for future challenges, including their GCSEs. Using the QLA as a guide for focused practice will support them in developing the confidence and independence needed to succeed.

Thank you for your continued support. Should you have any questions or require further clarification, please do not hesitate to contact me.

Yours faithfully,

Sarah Bedford  
Assistant Head of Department
